During the afternoon of 22 May 1954, 4 MiG-15s and U-MiG-15s fired at ground targets, in an area about 1,500 meters south of Friedrichsmohr. These targets were large white plates, arranged in a slanting position. The aircraft individually attacked the ground target, giving one burst of fire each time and pulled out of their dive at an altitude of about 100 meters, climbed steeply. Subsequently, the next aircraft would make the same attack. The firing range was guarded by Soviet sentries.

Comment. Friedrichsmohr firing range is located about 15 km west to north of Parchim. It is used for firing practices by MiG-15s from the fighter regiment stationed at Parchim airfield.
